

# 29-INCH ALUMINIUM HARDTAIL MTB

For importers, distributors and private-label brands in Europe and the United States.

Updated 1 October 2026 | NEW-29-ALLOY-HARDTAIL

Real reference photograph with detail optimisation. Components are a starting configuration, not a fixed bill of materials.

|                      |                                                                   |
|----------------------|-------------------------------------------------------------------|
| Wheel direction      | 29 inch                                                           |
| Frame direction      | Aluminium hardtail                                                |
| Drivetrain reference | 12 speed; Shimano 6100 derailleur family. Exact parts to confirm. |
| Brake reference      | Shimano MT200; rotor size and mounting to confirm.                |
| Fork reference       | Air fork with lockout; travel, axle and fit to confirm.           |
| Fit and weight       | Request frame-size range, geometry and assembled weight.          |

**Sample review:** Approve geometry and size mix; review brake and gear operation, wheel retention, finish, labels and the packed sample. Agree the exact parts and permitted substitutions.

**Service planning:** Agree derailleur-hanger, brake-pad and drivetrain references plus the fork service route.

**Send for quotation:** Reference, selling country, buyer role, quantity, rider use, size mix, parts, branding and packaging requirements.

Final MOQ, sample and production schedule, exact specification, price and market-document availability are confirmed in writing. This pack does not assert certification or a riding-performance category.

# 27.5-INCH FULL-SUSPENSION MTB

For importers, distributors and private-label brands in Europe and the United States.

Updated 1 October 2026 | NEW-27-5-FULL-SUSPENSION

Real reference photograph with detail optimisation. Components are a starting configuration, not a fixed bill of materials.

|                      |                                                                  |
|----------------------|------------------------------------------------------------------|
| Wheel direction      | 27.5 inch                                                        |
| Frame direction      | Aluminium full suspension                                        |
| Drivetrain reference | 12 speed; 50T largest cassette sprocket. Exact parts to confirm. |
| Brake reference      | Hydraulic disc; brake model and rotor sizes to confirm.          |
| Fork reference       | Air suspension fork; travel and compatibility to confirm.        |
| Rear suspension      | Request shock dimensions, travel, pivot hardware and geometry.   |

**Sample review:** Review suspension movement, shock and tyre clearance, hose routing, pivot play, brake function and gears. Agree intended use and the test scope for the final build.

**Service planning:** Agree pivot bolts, bearings, shock hardware, hanger and brake-pad references plus local service responsibilities.

**Send for quotation:** Reference, selling country, buyer role, quantity, rider use, size mix, parts, branding and packaging requirements.

Final MOQ, sample and production schedule, exact specification, price and market-document availability are confirmed in writing. This pack does not assert certification or a riding-performance category.
